SPECIAL FEATURES INFORMATION

PRODUCT

DESCRIPTION

THX Certified Select theater-reference sound

Experience the same reference volume at a commercial theater in rooms where the screen-to-seat distance is about 3,5m. Certified receivers must pass 2,000 bench-tests in 75 categories.

IMAX Enhanced Certified for Immersive Signature Sound

IMAX Enhanced uses DTS:X technology optimized for the IMAX signature experience and reproduces the full dynamic range of IMAX theatrical mixes. IMAX Mode delivers IMAX Enhanced content as the filmmakers intended.

Dirac Live Room Correction

Dirac Live analyzes your audio system and listening environment by examining acoustic data measured with a setup mic. It corrects both the timing and amplitude aspects of sound coloration using a mixed-phase correction filter throughout the listening area, not just a particular zone. Dirac Live improves staging, localization, clarity, voice intelligibility, and bass response

SMART AV Receiver multi-room entertainment

SMART AV Receiver is the heart of your home entertainment system. Access streaming content from Amazon Music HD, Pandora, Spotify, TIDAL, Deezer, and TunIn and share sound as part of a multi-room system via Works w. Sonos, Chromecast built-in, AirPlay 2, and DTS Play-Fi.

Works with Sonos

Add this receiver to your Sonos Home Sound System just by pairing it with a Sonos Connect or Port. The AVR ties into the Sonos ecosystem, changing inputs and responding to volume commands from the Sonos app.

Klipsch Optimize Mode

Allows you to easily integrate your new Klipsch Reference Premiere speakers seamlessly with your Onkyo AV receiver. To simplify setup, Klipsch and Onkyo teamed up to implement the precise crossover values for specific Klipsch speakers.
